COACHING AND MENTORING TRAINING COURSE OUTLINE

FOREWORD

In today's environment of changing technology and evolving organizations, coaching can create a strong competitive advantage. It provides continuous learning and develops people to meet current and future needs. Business mentoring and coaching is an investment that you make in developing your key resource people for the long-term benefit of the organization.

About 6 out of 10 (59%) organizations currently offer coaching or other developmental counseling to their managers and executives, according to a nationwide survey of more than 300 companies conducted by Manchester, a human capital consulting firm. Another 20% of organizations said they plan to offer such coaching within the next year.

Productivity happens when managers can develop strong relationships with their employees.
