**Knowledge
Management
(KM)**

COURSE LENGTH: 1.0 DAYS

This Knowledge Management (KM) training course teaches you how to implement an efficient method of collecting and using the informational assets and intellectual resources of the employees for the purpose of assisting in organisational success. This Knowledge Management course from PD Training teaches you how to create a system that captures knowledge purposefully for incorporation into business strategies, policies and practices at all levels of the organization.

This course helps construct the knowledge base of the organization by improving, systematizing, retaining and making use of the intellectual resources of its employees. Such intellectual resources are acknowledged as an important competitive edge and a driver of effectiveness for every organization.

The PD Training Knowledge Management Training Course gives you the ability to develop a knowledge management model, understand the life cycle of information, learn the rationale behind information management and the implementation and customization of knowledge management systems.

This comprehensive training course is available across the United States, including Atlanta, Austin, Baltimore, Birmingham, Boston, Charlotte, Chicago, Dallas, Houston, Jackson, Los Angeles, Manhattan, Miami, New York, Orlando, Philadelphia, San Antonio and Seattle.

KNOWLEDGE MANAGEMENT (KM) TRAINING COURSE OUTLINE

FOREWORD

Today's culture thrives on knowledge. Possessing knowledge gives advantages in making the right decisions or strategies to implement. The Internet distributes knowledge at split-second rates while laptops, tablets and smart phones bring knowledge to our fingertips in an instant. As the old adage says, "knowledge is power."

Organizations have a wealth of knowledge accessible through the people they touch internally (employees) and externally (customers). Organizations that allow knowledge to go unmanaged may be giving their competitors the upper hand in the market. The organization that is able to capture, store, and retrieve knowledge effectively is then capable of learning as an organisation. A learning organization is one where employees are empowered to change and develop new methods, thoughts, and strategies that will advance the mission of their organization.

Knowledge Management is the establishment of a system that captures knowledge purposefully for incorporation into business strategies, policies, and practices at all levels of the company. This course will teach participants how to initiate a knowledge management program at work. When it comes to knowledge management, any organization is able to implement a strategy. Wherever there are humans working together for one goal, there is knowledge to be harvested, stored and dispensed as required.

OUTCOMES

By the end of this course, participants will be able to:

- Describe the concepts behind knowledge management (KM)
- Examine the Do's and Don'ts of successful knowledge management
- Interpret the knowledge management lifecycle
- Identify the knowledge management paradigm
- Learn about the knowledge management models
- Build a rationale for KM in a company
